

WAX REPORT - Salomon CXC Cup, Freestyle Individual Start, Cable, WI

Date: December 17, 2023

Location: Cable, WI

Wax Reporter: Drew Gelin

Snow & Weather Conditions
Friday, Rain and breezy, 100% precipitation. High of 39F.
Friday night a low of 29F. Mixed precipitation.
Saturday will be a potential mix in the morning, daytime High of 40F.
Saturday night low of 28F, cloudy.
Sunday will be cloudy, High of 34F
Course may soften as the course is raced on. Man made snow will hold up but track will soften. Softer skis will be preferred if the course loses integrity. Cloud cover will help preserve track.

Tier 1 - Recommendations	Tier 2 - Recommendations
Glide:HS8 Glide Wax ironed in 150C. HS8 Liquid sprayed on ski and distributed over base with Combi felt cork (T0021). Let ski dry for 5 minutes and then brush with Fine Red Nylon brush (T0190B or T01900). Repeat liquid application between heats. Test Red Turbo block (TST08-2) applied with roto fleece and roto wool.	Glide:TSP8 Glide Wax (TSP08-4) ironed in 160C. TS8 Liquid (TS08L-12US) sprayed on ski and distributed over base with Combi fet cork (T0021). Allow liquid to dry and brush out with Fine Red Nylon brush (T0190B or T01900). Test HS8 Liquid as well and test Red Turbo block (TST08-2) applied with roto fleece and roto wool.
