

### WAX REPORT - The 2024 Geschmossel

Date: January 15, 2024

Location: Brettonwoods, NH

Wax Reporter: Drew Gelinias

Snow & Weather Conditions
As of this report trails were still closed. Looking at weather there are favorable temps despite some additional calls for rain on Saturday followed by freezing temps.
Saturday-High of 41F, Low of 21F. Mix of snow and rain
Sunday-High of 24F, Low of 13F. Evening snow showers and wind.
Monday-Partly cloudy and High of 21F.
Depending on what actually happens, track will be firm with a glaze or maybe fresh snow that stays in the woods. <b>Tier 1</b> will offer the <b>Klister option</b> . <b>Tier 2</b> will offer the <b>Hardwax option</b> .

Tier 1 - Recommendations	Tier 2 - Recommendations
Glide Wax HS6 or TSP6 ironed in. Marathon (white if fresh snow, black if transformed and dirty) roto wool application (T18W). Brush out with fine blue nylon brush (T01600).  KB20 Binder Spray applied to the kick zone. KX30 Ice Klister  May require a "covering" of V30 or VP40 if there is some fresh snow in tracks.	Glide Wax HS6 or TSP6 ironed in. Marathon (white if fresh snow, black if transformed and dirty) roto wool application (T18W). Brush out with fine blue nylon brush (T01600).  VG035 Binder ironed in. VP40 or V40 Blue Extra Several thin layers applied to kick zone and corked smooth each time. Allow skis to cool.
